

TKG AIR QUALITY PROTOCOLS

Added to Parent Handbook in Jan 2020

TKG will be using **IQAirVisual app** for local data.

AQI numbers over 110 on the Air Visual app would move play indoors.

Office staff will have the app with alerts on their phone to signal poor air quality. After modifications and classes are settled in we will send information via Brightwheel that indoor play is occurring for lunch play and park time.

Local schools go by AQMD notifications so we have also signed up for those alerts and will follow their guidelines when we receive them, but knowing they can be hours behind real time air quality and closed on Mondays we are choosing to use the IQAirVisual data for our first source.

	Good	Moderate	Unhealthy for Sensitive Groups	Very Unhealthy	Air Pollution Warning
AQI	0-50	50-110	111-150	151-200	200+
PM 2.5	~24	25~50	51~100	101~180	~181
Movements (recess) 10-15 blocks	No limitations	No limitations *inform sensitive students of the air quality and suggest low impact play, or indoor office plans when available	Indoor Play	Indoor play, low impact only	All outdoor activities should be heavily restricted, the threshold for school closure.
Lunch and Movement 1 hour block	No limitations	No limitations *inform sensitive students of the air quality and suggest low impact play, or indoor office plans when available	Indoor Play	Indoor play, low impact only	
Park Time Monday and Friday 3 hour block	No limitations	No limitations *inform sensitive students of the air quality and suggest low impact play, or indoor office plans when available	On campus indoor play	Indoor play, low impact only
